Premier Furnace Specialists is pleased to offer the following information on a used exothermic gas generator that we have available:

One (1) 4000 CFH Premier Furnace exothermic gas generator with:

- direct spark electronic ignition burner
- automatic ratio control with manual override
- water cooled with tube bundle for 90 deg. F gas outlet temperature
- an air-cooled gas dryer to reduce the gas temperature to 45 deg. F.
- Honeywell UDC 2500 temperature controller
- The unit has gages for easy diagnostics and maintenance

This generator built new in 2006.

Please see the attached pictures of the generator. The equipment can be viewed at our facility in Farmington Hills, MI upon request.

We can provide any transportation or installation services if desired. Price can be quoted upon request.
